Adrian Domínguez-Castro, PhD

Data Science, AI and Machine Learning

Henderson, NV, USA | adriandc1989@gmail.com | **GitHub**: https://github.com/DrAdrianDC
Linkedin Profile: https://www.linkedin.com/in/adrian-dominguez-castro-44b51a221/

SUMMARY

Machine Learning Engineer and Data Scientist with a PhD in Physics and 10 years of expertise in Quantum Chemistry, Data Science, AI and Machine Learning. Proficient in Python, SQL, and computational simulations, delivering data-driven solutions across science and technology sectors

SKILLS

- Machine Learning
- Deep Learning
- Data Science
- Python
- SQL
- Statistical Analysis

WORK EXPERIENCE

Freelance Machine Learning Engineer and Data Scientist **Feb 2024-Present**
Remote (Based in USA)

- Designed and implemented End-to-End Machine Learning and Data Science projects, showcasing them on GitHub (https://github.com/DrAdrianDC/Portfolio-for-Data-Science).

Postdoctoral Research Fellow **Feb 2023-Jan 2024**
Vanderbilt University Nashville, TN, USA

- Designed, developed and implemented a Machine Learning system that predicts physical-chemistry observables with more than 85% accuracy, resulting in 1 publication.
- Managed simulations and projects in Computational Chemistry and Machine Learning.

Doctoral Research Assistant **Oct 2018-Dec 2022**
University of Bremen Bremen, Germany

- Completed 3 multi-year research projects, resulting in 4 publications and improved data science solutions resulting in a 50% reduction in data acquisition and processing time.
- Led data modeling efforts to develop advanced simulations and predictive models for new nanoscience technologies, presenting insights at international scientific meetings. Built teams and forged collaborations across five countries (Germany, Spain, China, USA, France)

Graduate Research Fellow **Sept 2017-Jul 2018**
University of Groningen Groningen, The Netherlands

- Managed research on Theoretical Chemistry, and mentored junior team members. Optimized code for simulations and data science projects.

Visiting Research Scholar **Jan 2016-May 2016**
Thompson Rivers University Kamloops, Canada

- Developed computational modeling, and Data Science for Quantum Chemistry. Built teams and forged collaborations across two countries (Canada and Mexico), resulting in 1 publication.

Associate Junior Researcher **Sept 2015-Jul 2017**
Higher Institute for Technology and Applied Sciences (InSTEC) Havana, Cuba

- Led a team to meet project milestones, optimizing computational modeling and automating preprocessing to reduce time by 50%, while developing advanced predictive models for Computational Chemistry, resulting in 2 publications

Assistant Professor **Sept 2014-Jul 2015**
Technological University of Havana (CUJAE) Havana, Cuba

- Delivered Lectures and Tutorials of Calculus, Differential Equations, and Numerical Mathematics (1st and 2nd years Electrical Engineering)

EDUCATION

Ph.D. (Dr. rer. nat.) **Oct 2018 - Dec 2022**
University of Bremen Bremen, Germany
Dissertation: Theoretical investigation on light- driven ultrafast dynamics in nanoscale
(Grade: magna cum laude)

B.Sc. Radiochemistry **Sept 2008 - Jun 2014**
Higher Institute for Technology and Applied Sciences (InSTEC) Havana, Cuba
Dissertation: Essential amino acids interacting with Fumonisin B1: A Theoretical Approach
(Grade: summa cum laude)

CERTIFICATIONS

- Machine Learning by Stanford University & DeepLearning.AI on Coursera.
- AI for Everyone by Stanford University & DeepLearning.AI on Coursera.

PORTFOLIO DATA SCIENCE AND MACHINE LEARNING

Explore the projects in details at https://github.com/DrAdrianDC/Portfolio-for-Data-Science.

- **Project 0: Project on Data Cleaning**
  A comprehensive process of cleaning and preparing raw data for analysis and modeling.
  Tools & Techniques: Python, pandas, numpy, matplotlib, plotly, seaborn, scikit-learn
- **Project 1: Breast Cancer Classification**
  Classification problem using Support Vector Machine (SVM) in biomedical research.
  Tools & Techniques: Python, Machine Learning, SVM, scikit-learn, numpy, pandas, matplotlib, seaborn
- **Project 2: Wine Quality Prediction**
  Predicting the quality of wines using physicochemical variables.
  Tools & Techniques: Python, Machine Learning, XGBoost, Logistic regression, Random Forest, Neural networks, pandas, scikit-learn, tensorflow, keras, numpy, matplotlib, data visualization, Streamlit web app.
- **Project 3: WTI Oil Prices Anomaly Detection**
  Anomaly Detection in West Texas Intermediate (WTI) Crude Oil Prices.
  Tools & Techniques: Python, Deep Learning, yfinance, pandas, tensorflow, keras, numpy, matplotlib, data visualization, LSTM autoencoders
- **Project 4: Apple Stock Market Prediction**
  Apple stock market prediction using Deep Learning.
  Tools & Techniques: Python, yfinance, pandas,tensorflow, keras, numpy, matplotlib, data visualization, Deep Learning, LSTM
- **Project 5: Image Classification**
  Image Classification using Transfer Learning.
  Tools & Techniques: Python, Machine Learning, tensorflow, keras, seaborn, numpy, matplotlib, data visualization, Deep Learning, Transfer Learning,
- **Project 6: DFT Meets Machine Learning**
  Predicting hydrogen adsorption energies on rocksalt complex oxides combining DFT calculations and Machine Learning.
  Tools & Techniques: Python, Machine Learning, Deep Learning, Linear Regression, Random Forest, Neural networks, pandas, scikit-learn, tensorflow, keras, numpy, matplotlib
  Published in Theoretical Chemistry Accounts journal https://lnkd.in/ePBzVbsC
- **Project 7: Clustering**
  Clustering using the K-Means algorithm on the famous Iris dataset.
  Tools & Techniques: Python, Machine Learning, K-Means, pandas, numpy, matplotlib, seaborn, scikit-learn
